

Understanding Developmental Language Disorder (DLD) in the 14–25 Transition Years

Free online session : 19th December , 12.30pm

Language helps young people grow and become independent. But when understanding or expressing words is hard, life gets tougher.

DLD is lifelong, and its effects continue into adulthood.

Join Claire a parent engagement officer with Afasic and Ineke a help line volunteer as they share a parent's perspective on:

- What DLD can look like in teenagers
- The challenges young people face as they transition into adulthood
- The impacts it can have, both within the classroom and in wider life
- How parents and carers can better understand and support them
